Duration	7 mins 23 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Hash search

b. Binary search

c. Both (1) & (3)

d. Linear search ✓

Question **2**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Finding

b. Mining

c. Searching ✓

d. Discovering

Question **3**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the left sublist ✓

b. At the beginning of the list

c. In the entire list

d. In the right sublist

Question **4**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. n-1
b. n/2
c. log n
d. n ✓

Question **5**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the right sublist ✓
b. In the left sublist
c. In the middle of the list
d. At the beginning of the list

Question **6**

Incorrect

Mark 0.00 out of 1.00

What is the first step in binary search?

a. Sort the list ✗
b. Compare the target element with the middle element in the list
c. Compare the target element with the first element in the list
d. Divide the list into two equal parts

Question **7**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Both (1) & (3)
b. Linear
c. Hash
d. Binary ✓

Question **8**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

- a. Linear search ✓
- b. Binary search
- c. Hashing
- d. Jump search

Question **9**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

- a. By using a hash function
- b. By comparing each element in the list sequentially ✓
- c. By dividing the list into halves
- d. By sorting the list first

Question **10**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

- a. Dynamic search
- b. Hashing
- c. Binary search
- d. Linear search ✓

Question **11**

Correct

Mark 1.00 out of 1.00

If a list contains 1000 elements, how many comparisons would a binary search typically make in the worst case?

- a. 500
- b. 10 ✓
- c. 100
- d. 1000

Question **12**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. There must be a mechanism to delete and/or insert elements in the list ✓

b. Number values should only be present

Number values should only be present

c. There should be direct access to the middle element in any sublist

d. The list must be sorted

Question **13**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

a. Linear search can be applied to both sorted and unsorted lists. ✓

b. Linear search divides the list into halves.

c. Linear search requires the list to be sorted.

d. Linear search is more efficient than binary search on large lists.

Question **14**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

a. Binary search

b. Linear search ✓

c. Hash search

d. Interpolation search

Question **15**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Inserting elements into a list

b. Sorting elements in a list

c. Determining whether an element is present in a list ✓

d. Deleting elements from a list
